

Automatic Standby Generators

10, 15, 20 kW

Protect your home and family—everyday, whether you are home or away.

Home, family, assets—the things that matter most—remain protected during a power outage with the installation of a Honeywell standby generator. It's the reliable answer that ensures necessities, conveniences and amenities are always available, automatically backed up when the power goes out.

Honeywell

Automatic Standby Generators 10, 15, 20 kW

A Honeywell automatic standby generator seamlessly backs up the circuits you choose during a power outage. It automatically starts within seconds of detecting power loss, and runs on the home's existing natural gas or LP fuel supply. Choose a backup option from essential circuit, managed whole-house or complete whole-house coverage.

FEATURES

Remote monitoring included:

Remote monitoring is standard on 10-45 kW residential Honeywell automatic backup generators. Observe generator status, set operation parameters and receive maintenance information—all from the comfort of your home.

Superior reliability with the OHVI® engine:

Count on years of reliable performance from the Generac OHVI® engine. It's the only engine designed specifically for generator use, with a life span three to four times longer than most competitive engines, and a 2 year/200 hour maintenance interval.

Quiet Operation:

One of the quietest units available. Foam panels reduce noise levels, and the patented weekly WhisperCheck™ self-test mode is even quieter than normal operation.

Premium Features included:

Standard aluminum enclosure with RhinoCoat™ finish provides superior corrosion resistance, a necessity especially in coastal regions. Also includes base fascia, composite mounting pad, GFCI outlet and 5 year limited warranty and external status indicator lights.

Transfer Switch Options:

Complete the generator system with a Honeywell Sync Transfer Switch™. Utilizing digital load management, it allows for coverage of two air conditioners without additional components.

SPECIFICATIONS

Generac OHVI® Engine

- Electronic ignition/spark advance
- Full pressure lubrication system
- Low oil pressure shutdown system
- High temperature shutdown
- Moly plasma ring pack and graphite pistons

Sync™ Controller

- Manual/Auto/Off switch
- Programmable seven day exerciser
- Smart battery charger
- Utility & generator voltage sensing
- Utility interrupt delay
- Engine warm-up & cool-down
- Main line circuit breaker
- Electronic governor with +/- 1% voltage regulation
